HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (6:12 AM CST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Follow shad into the backs of creeks and flats 1-10 ft; spinnerbait, squarebill and topwater at a fast pace.**

BIOLOGY

BASS STAGE

Largemouth are in the fall transition — following bait into creeks and onto flats as water cools. Possible turnover window on stratified reservoirs — the bite can go off for a few days.

Basis: estimated water ~64°F — 75-day observed air record (NOAA ACIS) lagged for a lake (14-day response); no water-temperature

NATURAL FORAGE

Most likely menu: bluegill and juvenile sunfish around brush and piers, plus any shad the lake carries in open pockets. Hatch reports are thin on PFLs — match bank pops at dawn.

ALSO BITING

Bream / bluegill on the same brush the bass use. Catfish on deeper holes where allowed.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

gauge on the lake; air record trending falling

WATER BOARD — LAKE CHEAT SHEET

BOAT

Launch early at the on-site PFL ramp when open — confirm ramp status after overnight rain before you trailer. Fish bait, birds, and cover. Idle slow near bank anglers.

LURE BOX

TOP

Walking bait bone/chrome at dawn on slick banks between cells. Poppers over brush pockets. Soft buzzbait under storm light.

MID

Spinnerbait white/chartreuse when outflow chops the surface. Soft swimbait off points. Squarebill citrus on hard banks.

BOTTOM

Green pumpkin creature or Texas-rig worm in brush. Weightless stick bait after a crowd pulse. Compact jig on the first break off the bank.
