HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (first light CST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Follow shad into the backs of creeks and flats 1-10 ft; spinnerbait, squarebill and topwater at a fast pace.**

BIOLOGY

BASS STAGE

Largemouth are in the fall transition — following bait into creeks and onto flats as water cools. Possible turnover window on stratified reservoirs — the bite can go off for a few days.

Basis: estimated water ~62°F — statewide median of 24 lake estimates from the observed air record (NOAA ACIS) — no

NATURAL FORAGE

Most likely menu: shad or threadfin in open pockets where the lake carries them, plus bluegill around brush and docks. Match what you see along the bank at dawn.

ALSO BITING

Channel catfish on deeper edges after dark where allowed. Crappie soft language on brush if the lake carries timber.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

ACCESS — BANK / KAYAK / BOAT

BANK

Primary bank access is at Lake Brewer public access. Work permitted shoreline, points, and posted piers at first light. Start on shade lines, brush, and the first break.

KAYAK

Launch at Lake Brewer public access when the ramp and parking are open. Fish protected coves and windward points on light-breeze days. Have a bailout bank and get off the water for lightning.

BOAT

Plan dawn at Lake Brewer public access: topwater and spinnerbait on points and bait, then docks, brush, and the first drop. Confirm ramp status before you trailer. Soft weekday pressure still rises after mid-morning — launch early.

LURE BOX

TOP

Walking bait or popper at dawn on slick points. Soft buzzbait along shade edges when cloud cover holds.

MID

Spinnerbait white/chartreuse when a breeze chops the surface. Soft swimbait off points. Squarebill on riprap.

BOTTOM

Green pumpkin creature or Texas-rig worm in brush. Dropshot or shaky head on the first break when fish suspend.
