HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (7:13 AM EST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Follow shad into the backs of creeks and flats 1-10 ft; spinnerbait, squarebill and topwater at a fast pace.**

BIOLOGY

BASS STAGE

Largemouth are in the fall transition — following bait into creeks and onto flats as water cools. Possible turnover window on stratified reservoirs — the bite can go off for a few days.

Basis: estimated water ~60°F — 75-day observed air record (NOAA ACIS) lagged for a lake (14-day response); no water-temperature

NATURAL FORAGE

Glassy midday water pushes fish tight to shade and cover around Murray County. By, expect fish at Carters Reregulation Reservoir to settle into predictable shade lines you can re-hit without a long run.

ALSO BITING

Crappie can show on a slow midday drop along the first break near GADNR boat ramp: Coosawattee-Carters Lake WMA on the reregulation pool, Murray County. Bluegill mix on the same shade lines you fish for bass — keep a light jig ready as a bonus cast.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.
