HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (7:24 AM EST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Follow shad into the backs of creeks and flats 1-10 ft; spinnerbait, squarebill and topwater at a fast pace.**

BIOLOGY

BASS STAGE

Largemouth are in the fall transition — following bait into creeks and onto flats as water cools.

Basis: estimated water ~56°F — 75-day observed air record (NOAA ACIS) lagged for a lake (14-day response); no water-temperature gauge on the lake; air record trending falling

NATURAL FORAGE

Pressure should be light compared with the weekend. Local anglers and evening trips still stack the most popular ramps and the closest points after work, so fish the second stretch of cover if the first is taken.

ALSO BITING

Brookville sits on the Indiana and Ohio line; this Cast is the Indiana product. Smallmouth and spotted bass share the rock and are welcome bonus fish.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

DAM & WATER — GENERATION SCHEDULE

FIXED Dam-controlled water. No generation schedule posted by USACE LRL for Mon Nov 16 – Wed Nov 18 — check the operator page the morning you fish; releases and pool levels change daily. Stay outside buoyed restricted zones.

ITEM	NOTE	SOURCE
Brookville Lake Dam	No generation schedule posted by USACE LRL for Mon Nov 16 – Wed Nov 18 Observed: pool 742.64 ft (Mon 2:45 AM CT); observed outflow (USACE) 589 cfs (Mon 4:00 AM CT)	USACE LRL
Clarity	On Brookville, clear water and bright sun push fish to the shady side of rock and deeper transitions by midday, so plan the shallow work for the first and last hours.	

ACCESS — BANK / KAYAK / BOAT

BANK

Walk the posted banks at Mounds SRA and Quakertown SRA shoreline, plus posted recreation banks where rock and riprap fall into deeper water near the parking areas.

KAYAK

Launch from the Mounds or Quakertown ramps; work the protected coves and creek arms first and keep a short paddle back to the launch. These calm, clear mornings are ideal for a quiet paddle along the first creek-arm banks: parallel the cover, then stake out on the best brush or point once the sun is up.

BOAT

Run out from the Mounds, Quakertown, and Fairfield-area ramps; graph the rocky points and bluff transitions before a long run down the lake. With sunny skies, graph main-lake points and channel swings for shad and suspended fish before you commit to a long run.

LURE BOX

TOP

One topwater for calm dawn and shad schools.

MID

Pack a weightless stickbait. A squarebill or spinnerbait for windy banks.

BOTTOM

A compact flipping jig. A Texas-rig creature. A drop-shot or shaky head for clear-water depth.
