Perry Lake

Kansas

Mon Nov 16 – Wed Nov 18, 2026 · Central Time · Largemouth

BITE ODDS · THIS CAST

6/10 — Fair odds

0 2 4 6 8 10

PRESSURE	STORMS	WIND	SKY / RAIN	BASS STAGE	CROWD
+ Mostly stable	+ No lightning	− Up to 20 mph · unsafe chop	+ Clear / sunny (~13%)	+ Fall transition	+ Weekday · lighter traffic

WEEK Early-week setup on this water — highs **56–61°F**, lows **37–47°F**, rain chance up to **~13%**. Story is wind — pick banks the breeze is hitting and keep crossings short.

THREE-DAY WEATHER

MONDAY NOV 16

56° F high

LOW	37°F
SKY	Sunny
WIND	S 5–10 mph
RAIN	~0%
SUN	7:06 AM / 5:06 PM

Frame: Cold start — let the sun warm the shallows; the better bite often comes later in the day.

TUESDAY NOV 17

58° F high

LOW	43°F
SKY	Sunny
WIND	S 10–15 mph
RAIN	~0%
SUN	7:07 AM / 5:06 PM

Frame: Breeziest day — use ripple on wind-blown banks and points; open-water chop is higher risk.

WEDNESDAY NOV 18

61° F high

LOW	47°F
SKY	Sunny
WIND	S 15–20 mph
RAIN	~13%
SUN	7:08 AM / 5:05 PM

Frame: Breeziest day — use ripple on wind-blown banks and points; open-water chop is higher risk.

Window: Mon–Wed · Air: S · Bite window: dawn + last light

HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (7:06 AM CST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Follow shad into the backs of creeks and flats 1-10 ft; spinnerbait, squarebill and topwater at a fast pace.**

BIOLOGY

BASS STAGE

Largemouth are in the fall transition — following bait into creeks and onto flats as water cools.

Basis: estimated water ~57°F — 75-day observed air record (NOAA ACIS) lagged for a lake (14-day response), adjusted by 1 nearby USGS lake gauge; no water-temperature gauge on the lake; air record trending falling

NATURAL FORAGE

Weekday traffic at Perry State Park is softer than, but Rock Creek Marina banks and State Park pull-offs still draw after-work spinning rods from the Topeka and Lawrence corridor.

ALSO BITING

White bass and wipers often mix on windward State Park points when the south breeze piles shad against the rock — keep a slim crank or small spoon handy as a bonus bait, then return to the largemouth timber plan in Rock Creek.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

DAM & WATER — GENERATION SCHEDULE

FIXED Dam-controlled water. No generation schedule posted by USACE NWDM for Mon Nov 16 – Wed Nov 18 — check the operator page the morning you fish; releases and pool levels change daily. Stay outside buoyed restricted zones.

ITEM	NOTE	SOURCE
Perry Dam & Reservoir	No generation schedule posted by USACE NWDM for Mon Nov 16 – Wed Nov 18 Observed: pool 893.96 ft (Mon 3:00 AM CT); observed outflow (USACE) 200 cfs (Sun 6:00 AM CT)	USACE NWDM
Clarity	The patchy fog keeps the first hour quiet — crawl a stickbait along State Park riprap until visibility opens, then slide toward Rock Creek once the fog lifts.	

ACCESS — BANK / KAYAK / BOAT

BANK

Walk the posted shoreline at Perry State Park, then rotate to Rock Creek Marina public banks and Thompsonville recreation shoreline as the sun climbs. The patchy fog keeps the first hour quiet — crawl a stickbait along State Park riprap until visibility opens, then slide toward Rock Creek once the fog lifts.

KAYAK

Launch from Perry State Park or near Rock Creek Marina and stay inside protected arms when the south wind builds. The fog-then-sun pattern is ideal for a quiet paddle along Rock Creek timber before the main basin wakes; parallel the wood, then stake out on the best shade once the high climbs toward the mid-70s.

BOAT

Run out from the Perry State Park and Rock Creek Marina–area ramps. Idle through patchy fog with lights , then work State Park riprap while the east breeze is still light; graph Delaware River channel swings for suspended shad before you commit to a dam run.

LURE BOX

TOP

One topwater or small spoon when white bass crash shad on points.

MID

Perry’s box should cover State Park riprap and Rock Creek timber: a white or chartreuse spinnerbait for south-wind rock. A squarebill for riprap transitions. A weightless stickbait for foggy banks.

BOTTOM

A compact jig and Texas-rig creature for arm wood. A shaky head or drop-shot for clear midday channel swings.
