HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (6:18 AM PST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Trout plan: Target inflows and shoreline drop-offs as water cools; spoons, spinners and streamers, moderate.**

BIOLOGY

BASS STAGE

Trout are in the fall transition — following bait into creeks and onto flats as water cools.

Basis: estimated water ~54°F — 75-day observed air record (NOAA ACIS) lagged for a lake (14-day response); no water-temperature gauge on the lake; air record trending rising

NATURAL FORAGE

Small natural profiles and flash in moderation fit clear sunny water.

ALSO BITING

Low-light rock and deeper breaks. Yellow perch.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

DAM & WATER — CONFIRM BEFORE YOU LAUNCH

FIXED Dam-controlled water. No shared generation/level feed this cycle — check the agency page the morning you fish; releases and pool levels change daily. Stay outside buoyed restricted zones.

ACCESS — BANK / KAYAK / BOAT

BANK

Treat Echo Canyon State Park shoreline and legal park banks as the first casts. Aggressive presentations for rainbow trout while shade holds, then a jig when boats idle past. Felt soles help on Echo Canyon Reservoir's wet edges.

KAYAK

Paddle start Echo Canyon State Park protected shoreline. Skip the social-media race; quieter water often holds rainbow trout. On Echo Canyon Reservoir, launch etiquette is part of the plan.

BOAT

Powerboat start Echo Canyon State Park ramp and open water. Soften presentations as glare climbs. Pack sunscreen and water for Echo Canyon Reservoir.

LURE BOX

TOP

Small spoons at dawn. Inline spinners near the dam. Dry flies on calm mornings.

MID

Nymphs and soft hackles. Small jigs under a float. Light spoons mid-depth.

BOTTOM

Heavier spoons under high sun. Egg patterns near inflow. Slow retrieves on the bottom.
