## HOW TO FISH THIS WEATHER

### MORNING

- Shallow cover, points, creek mouths
- **First light (first light CST) → ~9 AM**
- Use any ripple as cover

### MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

### EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Slow down: steep points, channel drops and remaining grass just outside the creeks, between the fall flats and the 15-30 ft winter depth; suspending jerkbait with long pauses, jig-and-pig or blade bait crawled down the slope.**

## BIOLOGY

### BASS STAGE

**Largemouth are in the late fall transition — water under the mid-50s, so bass are sliding off the shallow flats toward steeper points and channel drops near their fall feeding areas.**

Basis: estimated water ~54°F — statewide median of 24 lake estimates from the observed air record (NOAA ACIS) — no
